Do it yourself Lead Dust Sampling Kit

UNYSE provides lead wipe analysis for home improvement contractors, property owners and other Renovators conducting wipe sampling after lead safe work practices to meet EPA and HUD requirements.

The Lead Dust Sampling Kit includes everything needed to complete a project, including supplies, directions and analysis. Once samples are collected and labeled, complete the enclosed chain of custody and shipping forms and drop in any UPS box. Samples will be delivered overnight and analyzed within 72 hours. Sample results will be transmitted immediately after analysis.

Pay as you go!

Payment must accompany your order

Include a check, complete credit card form or call to provide payment.

One fee does it all!

10% off for EEA Renovators!

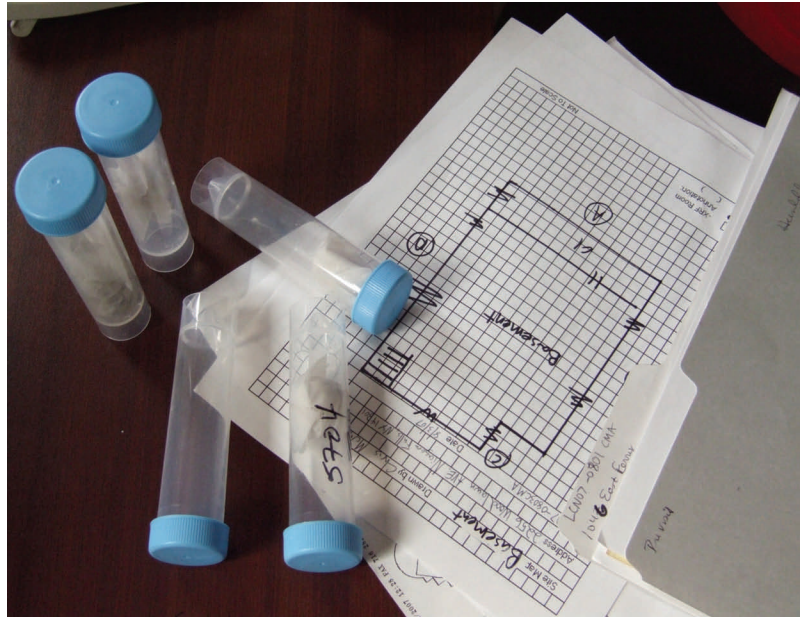

Another lead dust sampling kit will be mailed once your samples arrive!
